C. INSPECTION & SAMPLING PROCEDURE:

- i) Inspection of the wheat grain shall be carried out prior to loading on to the vessel by an authorized officer or accredited agency of the National Plant Protection Organization (NPPO) of the exporting country. Such inspection shall be carried out as per the guidelines prescribed under ISPM-12 (Guidelines for Phytosanitary Certificates-I PPC) to ensure that the wheat grain shipped to Pakistan has less than the prescribed limit of quarantine pests/weeds specified in the tender. The following scale of statistically valid sampling program should be applied to the entire shipment during loading.
- ii) A sample of one kilogram of wheat should be drawn for every 20 Metric Tons of wheat grain loaded on to the vessel from the export lot of wheat grain and the entire quality would be subjected to inspection to ensure that it is within the specified limit of quarantine pests and weeds. The sampling should be carried out either through a slotted grain sampler or a nobby sampler if it is bagged cargo or through an automatic sampling system attached to a grain elevator, which samples the grain at periodical intervals. The frequency of sampling and the size of samples will be set as indicated above. Alternatively, the samples may be drawn using deep bin probes (thermo sampler) from the ship holds/ grain bins. Alternatively, the exporting country may adopt GAFTA sampling rules No.124 or any other appropriate statistical sampling intensity so as to give 95% confidence for detecting the prescribed tolerance levels for the quarantine pests and weeds specified in the tender. The samples shall be inspected by an authorized officer of the NPPO or the accredited agency of the exporting country for grain contaminants such as bunt balls, ergots, grain weevil and weed seeds. For this purpose the samples have to be inspected visually to detect bunt balls, ergots, weevil grain and weed seeds. If presence of any quarantine pests or weeds is detected above the limit specified in this tender, the officer of the NPPO/Agency should stop loading the wheat grain. In case any bunted grain are noticed the same shall be subjected to microscopic examination to characterize the species. The phytosanitary certificate for ergot, dwarf bunt, granary weevil and quarantine weeds may be issued on such sampling and inspection system.
- iii) The cargo should be fumigated with Phosphine (i) prior to loading or after loading at the rate of 3 gms of phosphine active ingredient per cubic meter volume of wheat grain, to be retained for 21 days or (ii) In case of transit fumigation ship holds should have provision for forced recirculation of phosphine fumigation at the dose rate of 3gms per cubic meter or (iii) fumigated as prescribed under law of country of origin and recirculated and dust retained.
- iv) The seller shall furnish with the consignment (s) a certificate from a competent internationally accredited laboratory indicating:
 - a) The actual values of quality specifications of the shipments and not payable price based on these specifications.
 - b) The residues of none of the pesticides listed in Annexure-IB exceeds the MRLs indicated therein:
